FRANKFURT DUO

It is a brush born from the combination between the TYFLEX and TAPFLEX®.

The new tool uses the synergy of TYFLEX wire outside and the TAPFLEX® blades inside. The two parts perform a double work where the wire and the elastic part support the wear of a part and another reciprocally. The elastic part of the Tapflex is protected inside the tool from the wire which allows the tool to overhang

without breaking. The REVERSE innovation is a universal frankfurt attachment in a reverse position.

ADVANTAGES:

- Reduction of the number of heads and work of two products in one.
- Color enhancement and uniformity of the surface.

FRANKFURT TAPFLEX®MAGNUM

Elastic and flexible tool. This design is very durable and is used on large slabs and on hard materials. It is used when is required an increase of mechanical strenght and it enhance the color of the material.

FRANKFURT TAPFLEX®REVERSE OPEN 7

Elastic and flexible tool.

This shape is indicated in the thin grits for the greater coverage of the material.

SUGGESTIONS:

PRESSURE: 0,5 - 1 bar

WATER: we recommend to use a lot of water

SPEED: 50-70 cm/min

You may increase the speed if you increase the number of the heads.
