Lifter 30 / 50 / 60 / 75

Patented Aardwolf Lifter is an accessory designed for lifting and carrying loads in form of plates.

Aardwolf Lifters have a spring mechanism that automatically discharges the lifter when plate is fully seated on the ground. Thus, lifting and landing plates turns into an operation that can be performed by a single person.

Features

- **Dimensions**: Aardwolf Lifter has a compact structure, and allows for lifting tight packaged plates from shelves and containers. Low plates beside high plates doesn't cause any problem. These can be taken via scissor lifters, as well.
- **Multi purpose**: Ideal for construction works. Since compression mechanism is in front of the plate, it allows for panels to be placed close to a wall.
- **Safe**: Plate needs to be moved very little to be able to grasp the plate. This is a smaller angle than the balance will be broken, and prevents operator from being harmed.
- **Secure:** Aardwolf clamps holds the plates tightly.

Details

	Plate Lifter 30 Metric (mm-kg)	Plate Lifter 50 Metric (mm-kg)	Plate Lifter 60 Metric (mm-kg)	Plate Lifter 75 Metric (mm-kg)
Grasping range	0 - 30	10 - 50	15 - 60	30 - 75
Workload limit	1200	1200	1200	1200
Net weight	16.2	18.7	24.8	25
Gross weight	16.9	19.4	25.4	25.8
Package Size	380x200x230	380x200x230	420x220x250	420x220x250

Multiplier factor;
- Approximately 3:1 for Lifter 30
- Approximately 2.5:1 for Lifter 50
- Approximately 2.5:1 for Lifter 60
- Approximately 2.5:1 for Lifter 75
