

## Multiple Plate Shelf

Aardwolf multiple plate shelves include 3 meters long dual galvanized steel rail and rectangular section posts. Rectangular post can be placed anywhere along the shelf. All posts have a wall thickness of 4 mm or 5 mm, and are made of steel rectangular section with a minimum yield strength of 345 Mpa. Thus, vertical storage of plates becomes safe.

### Features

- Maximum number of marble or granite plates that can be stored safely with an inclination of 4° in each rail is based on type of the selected post, thickness and dimensions of the plate
- Aardwolf developed a simple calculator for users to be able to calculate the plate storage capacity

### Details

Multiple Plate Shelf	Metric (mm-kg)	Imperial (inch-lbs)
Galvanized steel rails	2926x152x145	0 - 4.1
Shelf height	145	1653
Rectangular opening	102x52	51
Increment	110	0 - 4.1
Rectangular pipe post	110x60	1653
Thickness of all posts	4 or 5	0.15 or 0.2
Rectangular section	100x50	3.9x2
